

TERMS OF REFERENCE (TOR) FOR THE APPOINTMENT OF A SERVICE PROVIDER TO PREPARE AN INVESTMENT PLAN, AREA MANAGEMENT STRATEGY, SITE DEVELOPMENT PLAN AND LAND USE PLANNING APPLICATION, WITH SUPPORTIVE STUDIES FOR THE THEMBALETHU NODE 1 PRECINCT TO SUPPORT THE NEIGHBOURHOOD DEVELOPMENT PROGRAMME IN THE GEORGE MUNICIPALITY

ANNEXURE B

GIS DATA REQUIREMENTS

All spatial data (spatial data/information/plans) related to the tender may be captured on the municipal spatial platform.

- Login information with applicable software, maps etc. will be provided to the successful tenderer.
- The municipality is currently utilizing the ArcGIS spatial platform and therefore previous knowledge of this will be beneficial to potential bidders.
- For detail of the current municipal GIS platform see <https://gis.george.gov.za/portal/home/>

Alternatively, data (spatial data/information/plans) may be captured in other platforms, but must be uploaded/transferred to the municipal platform, monthly, as follows:

- All Spatial data must be captured in the Hartebeesthoek94 / Lo23 (EPSG: 2050) coordinate system. <https://epsg.io/2050>
- Spatial data must be compatible with the municipal spatial platform: George Municipality currently utilizes the ArcGIS platform
- All relevant information to make the data usable on the municipal spatial platform such as symbology, metadata must be provided as part of the tender.
