- 29.** Where a truck is equipped with an onboard removable loading ramp it must have a non-slip surface and be of a sufficient length when lowered, that the inclination is no steeper than the inclines referred to in item 28, with the distance from the ground to the heel of the ramp not exceeding 120 millimetres.
- 30.** Ramps must be correctly adjusted to the exact height of the vehicle's floor.
- 31.** Journeys must commence as soon as possible after the live animals have been loaded and the animals must be promptly off-loaded upon arrival at the destination.

40. No wire or bailing twine may be used for tying the animal's legs or feet.
41. To avoid strangulation or neck-break, a slipknot may not be used where animals are secured to the vehicle by horns or neck, and the rope must be attached to the vehicle at the level of the animal's knees so that in the event of the animal falling, the possibility of serious injury or death is reduced, with the rope being long enough to allow the animal to lie comfortably in a natural position with its head upright.
