

# POWER LIMIT ADJUSTMENT PROJECT - Phase 3 Rollout

## KRAGBEPERKINGSAANPASSINGSWERK - Fase 3 Uitvoering

**From the 1<sup>st</sup> of July 2023, the municipality will bill consumers based on Installed Capacity**

- If you have an installed capacity of 60A prepaid meter in your premise you will be billed on 60A in line with the new tariff structure, **unless**;
- Your meter has been limited through the field team; or
- You have applied for capacity selection via [elec.applications@george.gov.za](mailto:elec.applications@george.gov.za) and received a reference.
- All consumers who have applied to the municipality, will be billed based on the **selected capacity** on the application form.
- All consumers who have already made their selections and field teams have implemented the changes **will not** be impacted by these changes.

**Please apply as soon as possible to avoid paying for installed capacity while requiring a lower capacity. By the end of June 2023, consumers would have had sufficient time to apply for their required capacity.**

**Bear this in mind when making your choice:**

- The Municipality cannot determine the optimal capacity required with the available meter data; therefore, **consumers** must determine what their energy and capacity requirements are.
- The municipality has noted that customers are selecting the capacity as low as possible to reduce cost without understanding the implications. This is evident by the number of upgrades required once a selection is implemented. Please consider your selection carefully.

**Contact 044 801 9243 for assistance (Municipal Account Number and Prepaid Meter Number handy) or email your query to [elec.applications@george.gov.za](mailto:elec.applications@george.gov.za)**

**Vanaf 1 Julie 2023 sal die munisipaliteit verbruikers faktureer op grond van geïnstalleerde kapasiteit**

- As jy 'n geïnstalleerde kapasiteit van 60A voorafbetaalde meter in jou perseel het, sal jy op 60A gefakteer word in ooreenstemming met die nuwe tariefstruktuur, **tensy**;
- Jou meter beperk is deur die veldspan; of
- Jy het aansoek gedoen vir kapasiteitseleksie via [elec.applications@george.gov.za](mailto:elec.applications@george.gov.za) en 'n verwysing ontvang.
- Alle verbruikers wat by die munisipaliteit aansoek gedoen het, sal gefakteer word op grond van die **gekose kapasiteit** op die aansoekvorm.
- Alle verbruikers wat reeds hul keuses gemaak het en veldspanne die veranderinge geïmplementeer het, **sal nie** deur hierdie veranderinge geraak word nie.

**Doen asseblief so gou moontlik aansoek om te verhoed dat u vir geïnstalleerde kapasiteit betaal terwyl u 'n laer kapasiteit benodig.**

**Teen die einde van Junie 2023 sou verbruikers genoeg tyd gehad het om vir hul vereiste kapasiteit aansoek te doen.**

**Hou dit in gedagte wanneer jy jou keuse maak:**

- Die Munisipaliteit kan nie die optimale kapasiteit bepaal met die beskikbare meterdata nie; daarom moet **verbruikers** self bepaal wat hul energie - en kapasiteitsvereistes is.
- Die Munisipaliteit het opgemerk dat kliënte die kapasiteit so laag as moontlik kies om koste te verminder sonder om die implikasies te verstaan. Dit is duidelik uit die aantal upgraderings wat nodig is, sodra 'n keuse geïmplementeer is. Oorweeg asseblief jou keuse noukeurig.

**Kontak 044 801 9243 vir navrae (Gebruik u municipale rekeningnommer en/of voorafbetaalde meter nommer as verwysing) of e-pos jou navraag na [elec.applications@george.gov.za](mailto:elec.applications@george.gov.za)**
