- (1) The acquisition and storage of goods in bulk (other than water) which necessitate special safety arrangements, including gasses and fuel, should be avoided wherever possible.
- (2) Where the storage of goods in bulk is justified, such justification must be based on sound reasons, including the total cost of ownership, cost advantages and environmental impact and must be approved by the Accounting Officer.

33.1 ROSTER SYSTEM

A Roster System may be applied for a list of preferred service providers, suppliers, contractors and/or consultants subject to the development and adoption of a Roster System Policy containing the following:

- (1) Roster scope for service providers, suppliers, contractors and/or consultants.
- (2) Process of selection and appointment on the Roster System Database.

34. APPOINTMENT OF CONSULTANTS (read with Cost Containment policy)

- (1) The Municipality should consult the National Treasury's instructions in respect of the appointment of consultants.
- (2) Consultants should only be engaged when the necessary skills and/or resources to perform a project/duty/study are not available and the Accounting Officer cannot be reasonably expected either to train or to recruit people in the time available.
- (3) If transfer of knowledge and skills or training is an objective, it should be specifically outlined. The terms of reference or specifications should indicate the objectives, nature, scope and goals of the training programme, including details on trainers and trainees, skills to be transferred, time frames and monitoring and evaluation arrangements to enable consultants to estimate the required resources.
- (4) As consultant services are specialised types of services, specifications for procurement should be drafted on a case-by-case basis depending on the nature and the type of consulting work under consideration.
- (5) Specifications should take into account production of documents where copy-right, patents/ownership is concerned when drafting documentation of this nature. Copyright, patent right or ownership shall be vested in the Municipality. Evaluation criteria should include:
 - (a) Consultant's relevant experience.
 - (b) Quality of the methodology.
 - (c) Qualifications of key personnel; and
 - (d) Transfer of skills and knowledge (if applicable).
- (6) In addition to any requirements prescribed by this policy for competitive bids, bidders must furnish particulars of:

The relationship between the Municipality and the Consultant will be one of purchaser/provider and not employer/employee. The Accounting Officer or his/her delegated official is, however, responsible for monitoring and evaluating contractor performance and outputs against project specifications and targets and should take remedial action if performance is below standard.

- (8) The appointment of consultants shall be done in accordance with applicable Supply Chain Management legislation, regulations and this policy. The procurement method selection will be determined by the scope of the project, the quality of the service and complexity of the project.
- (9) A consultant request form must be completed and the need for consultants must be linked to the strategic objective of the relevant project. Issues that should be discussed and clarified are:
 - (a) The need for a consultant.
 - (b) Whether it would be a once-off or recurrent service.
 - (c) Will any skills or knowledge transfer be required?

 - (a) the need for high-quality services.
 - (b) the need for economy and efficiency.
 - (c) the need to give qualified consultants an opportunity to compete in providing the services.
 - (d) the importance of transparency in the selection process.
- (11) Consultants should not be hired under the following circumstances:
 - 1. A firm, which has been engaged by the AO to provide goods or works for a project and any of its affiliates, should be disqualified from providing consulting services for the same project. Similarly, a firm hired to provide consulting services for the preparation or implementation of a project and any of its affiliates, should be disqualified from subsequently providing goods or works or services related to the initial assignment (other than a continuation of the firm's earlier consulting services as described below) for the same project, unless the various firms (consultants, contractors, or suppliers) are performing the contractor's obligations under a turnkey or design-and-build contract;
 - 2. Consultants or any of their affiliates should not be hired for any assignment which, by its nature, may be in conflict with another assignment of the consultants. As an example, consultants hired to prepare an engineering design for an infrastructure project should not be engaged to prepare an independent

environmental assessment for the same project, and consultants assisting a client in the privatization of public assets should not purchase, nor advise purchasers of such assets.
