1. APPLICATION

Application is made in terms of Section 15(2)(e) of the Land Use Planning By-Law for the George Municipality, 2023 for the consolidation of Erf 1792 George, Erf 1793 George, Erf 1794 George, Erf 1795 George, Erf 1796 George, Erf 1797 George and Erf 1798 George.

The proposed consolidation diagram is attached hereto as **Annexure "A"**. The completed application form for the consolidation is attached hereto as **Annexure "B"**.

2. DEVELOPMENT PROPOSAL

George Preparatory School and Outeniqua Primary School have been developed on 7 erven, Erf 1792 George up to and including Erf 1798 George. The following aerial photo shows the site layout of the development in relation to the 7 erven.

The following photo shows the east elevation (Cradock Street) of the area where the current erf boundary between Erf 1797 George (left on the photo) and Erf 1798 George (right on the photo) is located.

The following photo shows the east elevation (Cradock Street) of the current Erf 1795 George.

The following photo shows the east elevation (Cradock Street) of the area where the current erf boundary between Erf 1792 George (left on the photo) and Erf 1793 George (right on the photo) is located.

The following photo shows the west elevation (Meade Street) of the area where the current erf boundary between Erf 1798 George (left on the photo) and Erf 1796 George (right on the photo) is located.

The following photo shows the west elevation (Meade Street) of the current Erf 1794 George.

The following photo shows the west elevation (Meade Street) of the area where the current erf boundary between Erf 1793 George (left on the photo) and Erf 1792 George (right on the photo) is located.

The fact that the school site consists of 7 individual erven inhibits the possible future extension of the school buildings. The purpose of this application is, therefore, to consolidate Erf 1792 George up to and including Erf 1798 George, to enable further development of the consolidated erf.

3. PRE-APPLICATION CONSULTATION

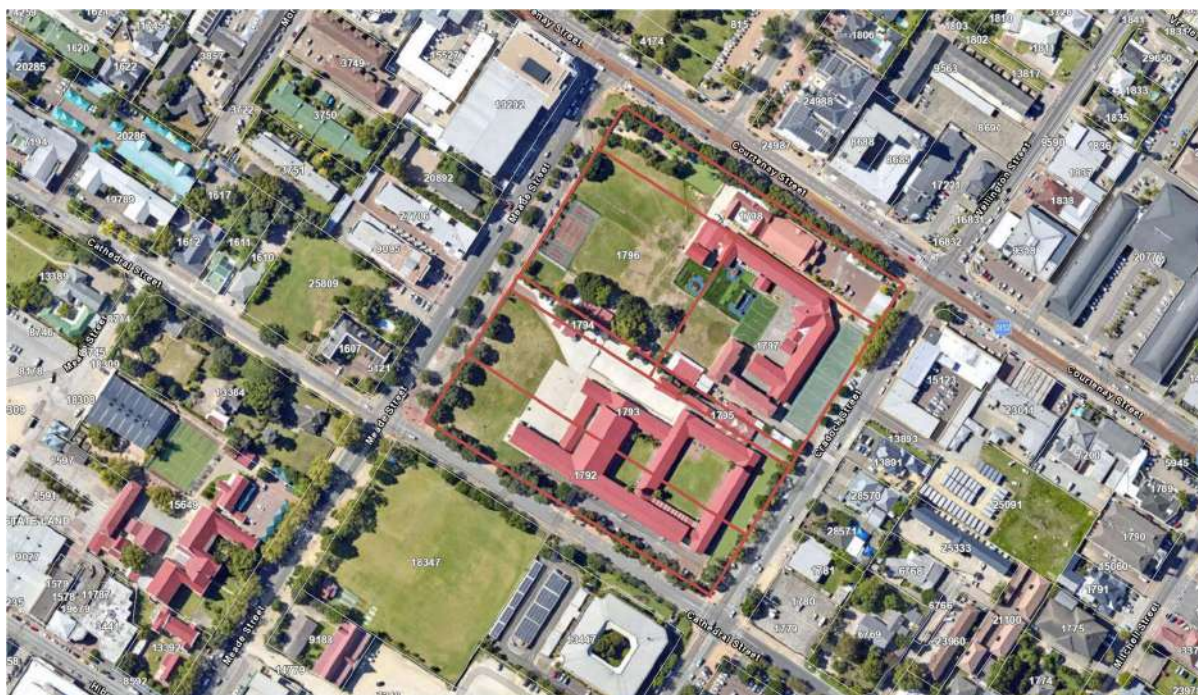

A pre-application consultation was not requested as the application entails only the consolidation of Erf 1792 George up to and including Erf 1798 George and no other land use application (i.e. rezoning) is involved. This is in line with the e-mailed directive in this regard to various consultants by the Municipal Town Planners, which was issued by e-mail dated 10 May 2022.

5. DESIRABILITY OF APPLICATION FOR THE CONSOLIDATION OF ERF 1792 GEORGE UP TO AND INCLUDING ERF 1798 GEORGE

5.1 Introduction

The term "desirability" in the land use planning context, may be defined as the degree of acceptability of the land use on the land units concerned. The desirability of the intended consolidation shall be discussed with reference to the aspects listed below.

- Physical characteristics of the site.
- The proposed main land uses.
- The compatibility of the proposal with existing planning documentation, spatial frameworks, legislation and policies.
- The compatibility of the proposal with the character of the surrounding area.
- Potential of the site.
- Accessibility of site.
- Availability of parking.
- Provision of services.

It will be indicated in the following paragraphs that the proposal will be regarded as being desirable as far as the mentioned aspects are concerned.

5.2 Physical characteristics of the erven

5.2.1 Topography

The application erven are flat. The topography of the erven has been taken into consideration with the design of the existing buildings and is of such nature that it has no impact on the consolidation as proposed in this application.

5.2.2 Surface conditions

Little information concerning the soil condition of the application erven is available. The soil condition of the erven seems stable. The existing structures on the application erven and other erven in the vicinity in the vicinity do not appear to have construction anomalies relating to unstable soil conditions. It can, therefore, be accepted that the soil condition has no impact on the consolidation as proposed in this application.

There is as such no reason from this point of view why this application cannot be supported.

5.2.3 Vegetation

The aerial photo in point 2 of this motivation report shows that vegetation on the application erven consists of grass, which is neatly cut and used as sports fields and play areas and a few large trees. The application erven are surrounded by street trees on all 4 street boundaries.

No new buildings are proposed in this application. There is as such, no reason from this point of view why the application for consolidation cannot be supported.

5.2.4 Other characteristics

The application properties are not affected by flood lines, fountains or other unique ecological habitats.

5.2.5 Conclusion

From the contents of the above-mentioned paragraphs, it is clear that there is no reason from a physical characteristics point of view why the application for consolidation cannot be supported.

5.3 Proposed land use

The purpose of the application is the consolidation of Erf 1792 George up to and including Erf 1798 George to accommodate the existing education facilities on the erven on one erf. No change of zoning will take place as the proposed consolidated erf will still be used for school purposes.

There is, therefore, no reason from a land use point of view why the application for consolidation cannot be supported.

5.4 Compatibility of development proposal with existing planning documentation and policies

5.4.1 Introduction

Different planning documents apply to the application and the desirability and compatibility of the application regarding each of these documents will subsequently be discussed.

5.4.2 Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) (SPLUMA)

Section 7 of the "Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013)" lists 5 development principles which must be applied when any development application is to be evaluated. The principles referred to are as follows:

- "Spatial justice"
- "Spatial sustainability"
- "Spatial efficiency"
- "Spatial resilience" and
- "Good administration".

Different development principles are identified under each of the 5 abovementioned principles which must be applied when a land use application is to be evaluated. The proposed application for consolidation will subsequently be evaluated on each of the principles.

Good administration		
Criteria	Compliance	Planning Implication
All spheres of government ensure an integrated approach to land use and land development that is guided by the spatial planning and land use management systems as embodied in this Act.	This is general principle that municipalities need to comply with.	Input was received from all spheres of government when the George Spatial Development Framework was drafted. An integrated approach, guided by the spatial planning and land use management systems as embodied in this Act, was thus followed in the preparation of the George Spatial Development Framework. As the development proposal can be deemed to comply with the contents of the George Spatial Development Framework, 2023 it can be stated that the proposal complies with this specific criterion.
All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of spatial development frameworks.	This is general principle that municipalities need to comply with.	Input was received from all government departments and sectors when the George Spatial Development Framework was drafted. An integrated approach, guided by the spatial planning and land use management systems as embodied in this Act, was thus followed in the preparation of the George Spatial Development Framework. As it can be deemed that the development proposal complies with the contents of the George Spatial Development Framework, 2023 it can be stated that the proposal complies with this specific criterion.
The requirements of any law relating to land development and land use are met timeously.	This is general principle that municipalities need to comply with.	The George Municipality has adopted the George Municipality: By-law on Land Use Planning, 2023 which prescribes procedures and timeframes which developers must adhere to

		when submitting land use applications and which officials needs to take into consideration when considering applications. This application has been prepared in keeping with the requirements as per the George Municipality: By-law on Land Use Planning, 2023 and the application will from date of submission be dealt with and be considered within the timeframes prescribed in the by-law.
The preparation and amendment of spatial plans, policies, land use schemes as well as procedures for development applications, include transparent processes of public participation that afford all parties the opportunity to provide inputs on matters affecting them.	This is general principle that municipalities need to comply with.	This application will be advertised in accordance with the stipulations as contained in the George Municipality: By-law on Land Use Planning, 2023. All parties will be given the opportunity to participate in the public participation process and will be afforded the opportunity to provide input on the application.
Policies, legislation and procedures must be clearly set in order to inform and empower members of the public.	This is general principle that municipalities need to comply with.	The George Municipality: By-law on Land Use Planning, 2023 contains clear procedures set to inform and empower members of the public. This application will be subjected to these procedures.

As can be seen from the table above, it can be argued that the proposal can be regarded as being compatible with the 5 development principles of SPLUMA.

5.4.3 Land Use Planning Act, 2014 (Act 3 of 2014) (LUPA)

In terms of the above Act, it is expected of a municipality to consider the compatibility of any development proposal with existing provincial and municipal spatial development frameworks and as well as more detail local spatial frameworks.

Section 19(1) and 19(2) of the Land Use Planning Act, 2014 (Act 3 of 2014) (LUPA) which is relevant to this application reads as follows:

- 19(1) *If a spatial development framework or structure plan specifically provides for the utilization or development of land as proposed in a land use application or a land development application, the proposed utilization or development is regarded as **complying** with that spatial development framework or structure plan.*
- 19(2) *If a spatial development framework or structure plan does not specifically provides for the utilization or development of land as proposed in a land use application or a land development application, but the proposed utilization does not conflict with the purpose of the relevant designation in the spatial development framework or structure plan, the utilization or development is regarded as being **consistent** with that spatial development framework or structure plan.”*

The compatibility of the development proposal with existing spatial development frameworks is addressed in points 5.4.4 to 5.4.6 of this report.

The development principles referred to in Section 59 of LUPA, which should also be considered when motivating an application, are directly in line with the principles of SPLUMA which have been discussed in detail in section 5.4.2 above. The comments in point 5.4.2 are thus also relevant as far as Section 59 of LUPA is concerned.

5.4.4 Western Cape Provincial Spatial Development Framework (WC-PSDF)

5.4.4.1 Introduction

The Western Cape Provincial Spatial Development Framework (WC-PSDF) is one of the most important planning guidelines in the province. The framework not only provides for a new spatial development pattern for the province but also clearly indicates where development may take place and where it may not take place. The provisions of the development framework must therefore be considered with any development proposal.

In terms of the framework, several principles are mentioned, namely spatial justice, spatial sustainability, spatial resilience, spatial efficiency, accessibility and quality of life and good administration that spatial planning must comply with. The impact of the application on spatial justice, spatial sustainability, spatial resilience, spatial efficiency, has already been fully

discussed in section 5.4.2 above and it has been shown that the proposed development complies with the relevant principles mentioned.

Several policy statements are also highlighted in terms of the WC-PSDF which must specifically correlate with the mentioned principles. Some of the policy statements that are relevant to this town planning application will be addressed in the following points.

5.4.4.2 Protection of agricultural land

In terms of the WC-PSDF it is indicated that agricultural land must be protected. The application erven are zoned Community Zone I and will not be used for agricultural purposes. The mentioned objective of the WC-PSDF is therefore not relevant to this application.

5.4.4.3 Urban edge

The WC-PSDF provides for a guideline which determines that towns should identify an urban edge and that development should be restricted to areas inside the urban edge. The George Municipality identified an urban edge, and the application erven fall within the identified urban edge. As such, the development as proposed in this application will not result in "urban sprawl". The proposal therefore meets the requirement of this guideline set out in the WC-PSDF.

The framework does not go to the detailed level of individual erven and therefore does not contain further information which could be used to determine whether this application falls within the stipulations of the framework.

5.4.5 George Spatial Development Framework, 2023 (GSDF)

The application erven are located within the study area of the George Spatial Development Framework, 2023 (GSDF) and this framework therefore applies to this application. In terms of the GSDF, the application erven are located within the **Urban Edge, as well as in the CBD of George**. The George CBD is described as a "Category A" node, which is a high-density mixed-use area, including office use and high-density housing options. The area where the application erven are situated, is indicated on "**Map 23: George CBD and York Street Southern Precinct**" as

the “core (Business Edge) area”, which includes “*mixed uses such as retail, commercial, offices, residential and other, but excludes industrial*”.

This application only entails the consolidation of the application erven. No rezoning is proposed. The proposed consolidated erf will still be used for education purposes, which fits in with the “*mixed use*” and “*residential*” components, indicated in the Spatial Development proposals for the George CBD.

Except for the indication that the application erf falls within the Urban Edge of George, as well as within the George CBD, the George Spatial Development Framework, 2023, contains no specific future development proposals for this area which could be used to evaluate the compatibility of the consolidation application with the Spatial Development Framework.

5.4.6 George CBD Local Spatial Development Framework, 2016

The application erven are situated in the street block between Courtenay -, Cradock -, Cathedral – and Meade Streets, in the George CBD and thus fall within the “High Priority Edge” of the “*Medium term Business Development Edge*” as indicated on the George Central Business District Spatial Development Plan.

The purpose of this application is only to consolidate the 7 Community Zone I erven into 1 Community Zone I erf to accommodate the current education facilities on one erf. The continuation of the use of the consolidated erf for education purposes will contribute to the mixed-use activities in the CBD, without having a negative influence on the character of the area concerned. From the contents of this point, the consolidation as proposed in this application can be regarded as being in keeping and compatible with the George CBD Local Spatial Development Framework 2016 and therefore, can be supported.

The Local Spatial Development Framework does not contain any stipulations with regards to the consolidation of erven and can, therefore, not be used to further evaluate the compatibility of this land use application with the LSDF.

5.4.7 George Integrated Zoning Scheme By-Law, 2023

Erf 1792 George up to and including Erf 1798 George are zoned Community Zone I in terms of the George Integrated Zoning Scheme By-Law, 2023. The purpose of this application is to consolidate the 7 erven to accommodate the current school facilities on one erf. No additional erven will be created by the proposed consolidation, and no rezoning is proposed.

The By-Law does not contain any stipulations with regards to the consolidation of erven which could be used to evaluate the compatibility of the proposed consolidation with the By-Law. Should any future extension of the facilities be contemplated, due process will be followed to obtain the required approval from the municipality, in respect of development parameters such as coverage, building lines, parking and height of buildings.

5.4.8 Title Deeds

Although the title deed of an erf is not a planning document, it sometimes still contains conditions which may have an essential impact on the development potential of an erf.

The title deeds of the application erven were inspected, and it was found that they contain no conditions prohibiting the consolidation as proposed.

5.4.9 Conclusion

From the above information it is clear that the application for consolidation complies with the Planning Polices and Planning Guidelines mentioned and can be considered desirable.

5.5 Compatibility of the proposal with the character of the area

The application erven are situated in the north of the George CBD and are all zoned Community Zone I. The erven, which are surrounded by various business buildings, are used for education purposes. The proposed consolidation will only remove the communal boundaries between the mentioned erven. No rezoning is applied for. The consolidated erf will still be used for education purposes.

The application as submitted will therefore have no impact on the character of the surrounding area. It will also not set an undesirable precedent and can, therefore, be supported.

5.6 Compatibility of the proposal with the natural environment of the area

The application erven form part of the George CBD and are situated within the Urban Edge of George. The erven have been developed and used for education purposes over a long period of time. The portions of the erven which have not been covered by buildings are mostly used as playground or sports fields. There are no conservation worthy natural environmental elements situated on the application erven. The proposed consolidation will thus not have a negative impact on the natural environment in the area.

5.7 Potential of the erven

The application erven are zoned “Community Zone I” in terms of the George Integrated Zoning Scheme By-Law, 2017 and are used for education purposes.

The proposed consolidation will not result in a change in the zoning of the relevant erven but will enable the possible future extension of the school buildings on the consolidated erf, thus enhancing the education capability of the school. The proposed consolidation will thus result in a slight increase in the potential of the consolidated erf.

5.8 Access to the erven

The application erven are situated within the George CBD and are surrounded by Courtenay -, Cradock -, Cathedral – and Meade Street. The proposed consolidation will not have a negative impact on access to the consolidated erf, as all the existing entrances will remain intact. It will also not result in an increase of traffic in the streets and will have no impact on traffic movement or the accessibility of surrounding properties, as no additional erf or access will be created.

5.9 Provision of parking bays

Currently, on-site parking is provided in the north-east corner of the property, with access from Courtenay Street as well as on the southern side of the property, with access from Cathedral Street and on the western side of the property, with access from Meade Street. An additional parking area, with a separate entrance and exit to Meade Street has been constructed on the wide sidewalk on the western (Meade Street) side of the property, with further parking bays on the eastern side, which are directly accessed from Cradock Street.

The current provision of parking is not impacted upon by the proposed consolidation.

Should any future extension to the education facilities, which could result in increasing the demand for parking, be contemplated, provision for addition parking will be made at that stage as per the parking requirements applicable to schools, as set out in a table in section 42 of the George Integrated Zoning Scheme By-Law, 2023.

5.10 Provision of services

The application erven have been linked to the Municipal services available in the area for a considerable time. It is not anticipated that any changes to Municipal services will be required because of this proposal.

5.11 Summary

Erf 1792 George up to and including Erf 1798 George are used for education purposes. The application for consolidation of Erf 1792 George up to and including Erf 1798 George, can be deemed desirable for the following reasons:

- The erven have the same zoning, namely Community Zone I.
- The Title Deeds of all erven do not prohibit consolidation.
- The stipulations in the Title Deeds are reconcilable.
- The erven have the same owner.
- There are no Municipal services on the communal boundaries, so no Municipal services will be disrupted because of the consolidation.
